Customer Focus

We continuously strive for solutions that uniquely address our customers' needs. Our long-term partnership approach to solving pain points has led to an unsurpassed level of service and flexibility. Especially in these challenging times, innovations such as the **Prologis Essentials Marketplace** and **PARKLife** are helping to create healthier environments where our customers' businesses can thrive.

COVID-19

Our key focus continues to be the well-being of our employees and customers. Throughout 2020, we delivered a steady cadence of market insight and research related to the effects of the pandemic on logistics real estate and the supply chain. Tailored innovations and park safety measures meant that buildings could safely remain open in compliance with government regulations, which limited operational impacts for our customers. Prologis' employee assistance is ongoing as our global workforce continues to adapt. Free stimulus programmes cover broad-ranging support, from help with creating remote workstations to mental and physical fitness, health and well-being, and coaching and counselling.

Sustainable Development and Innovations

Prologis has demonstrated a decades-long commitment to environmental stewardship, social responsibility and governance (ESG). We implement innovations from our **Prologis Labs** directly into our buildings, raise environmental standards, ensure protection of site biodiversity and develop parks with lasting community benefits. Working with climate change charity Cool Earth and sustainability certification company The Planet Mark, we also mitigate whole-life carbon emissions in all new developments across Europe.

Additional 2020 Highlights:

- Research: **COVID-19 special report series**
- Research: Automation and Logistics Real Estate – **part one, part two**
- Launch of **Prologis Essentials Marketplace**
